To Brian Schweitzer, Governor

Dear Governor Schweitzer:

We are pleased to submit to you this Report of the Mental Disabilities Board of Visitors (the Board). The Board provides a detailed report to the Governor’s office of each of its reviews of mental health facilities and the Montana Developmental Center. This report provides additional information about the Board and details its activities for the period January 1, 2006 through December 31, 2007.

This report includes information about the work undertaken by the Board in accordance with its statutory obligations. It also gives an overview of the site reviews it has conducted during this reporting period, and recommendations for transformation of Montana’s public mental health system and improvements at the Montana Developmental Center.

The Board continues to benefit significantly from assistance provided to it, either directly or indirectly, by consumers, family members, consumer and family organizations, clinicians, service provider personnel, staff and advisors in the Governor’s office and the Department of Public Health and Human Services, and others. On behalf of the Board, we thank all those persons and agencies for the key role that they continue to play in enabling the Board to fulfill its responsibilities.

The Board operates in a highly complex environment, in which there are many tensions and challenges, and therefore it must inevitably navigate with care the points of view, experiences, priorities, and limitations of state administrative agencies, provider organizations, advocates, service recipients, consumers, and families. We feel confident that the Board has performed its difficult work always with the interests of mental health consumers and their families foremost in mind.

Yours sincerely,

Gene Haire
Executive Director

Joan-Nell Macfadden
Chair

The Board has completed its 32\textsuperscript{nd} full year of operation since its inception in 1975, and continues to:

(1) conduct consumer-oriented reviews of mental health facilities and the Montana Developmental Center,

(2) assist consumers in resolving complaints about public mental health services and about services at the Montana Developmental Center,

(3) provide in-house legal representation and advocacy to patients at Montana State Hospital.

Site Reviews
The Board completed 9 reviews of mental health facilities and 1 review of the Montana Developmental Center from January 2006 through December 2007.

Education
The Executive Director and staff provided information about the Board and its
statutory purpose at a number of mental health treatment venues, the Montana
State Hospital, Montana Developmental Center, and other organizations during
the course of the year.

Attendances at Conferences
Board Members, Executive Director, and staff attended a number of conferences,
workshops and continuing education including: NAMI-Montana Mental Illness
Conferences – 2006 and 2007; Cultural Diversity Training – 2007; Countering
Internalized Stigma Among People with Mental Illness – 2007, Winds of Change

Participation on Committees, Councils, Associations, Organizations
Board Members, Executive Director, and staff are active participants in a number
of committees, councils, associations, and organizations addressing critical issues
affecting services of people with mental illnesses and developmental disabilities
including: Admission and Discharge Review Team(Executive Director is the Chair
of this group), Mental Health Transformation / Information Workgroup, Montana
Developmental Center Human Rights Committee, Developmental Disability
Program Quality Council, Developmental Disability Program Rates Reimbursement
Advisory Group, Montana Association of Community Disability Services, Montana
Association of Community Disability Services Systems Advocacy Committee, Great
Falls Mental Health Crisis Peer Support Board, Great Falls (CIT) Crisis Intervention
Investigative Committee, Great Falls Early Childhood Mental Health Coalition,
Montana State Hospital Grievance Committee, Montana Mental Health Association,
National Alliance for the Mentally Ill, Service Area Authorities, Local Mental Health
Advisory Councils, and the Mental Health Oversight Advisory Council.

Interaction with the Legislature
Board Members and the Executive Director attended and testified on issues and
bills before various Committees during the 60th Legislative session and during the

Clinical Consultants
The Board retains a number of clinical consultants. These consultants participate in site reviews and perform other clinical reviews at the Board’s request. Consultants who worked for the Board during this period are:

- William Doctor, PharmD, BCPP
- Pat Frawley, MSW, LCSW
- Carla Cobb, PharmD, BCPS
- Irene Walters, RN
- Sheila Smith, MEd, LCPC
- Jack Hornby, MD
- Jacki Hagen, PharmD
- Stan Fleming, MA, LCPC

Consumer Consultants
The Board places a particular emphasis on the consumer perspective in its review of mental health and developmental disabilities facilities. During this period, the Board retained the services of one consumer consultant:

- Tom Bartlett

Website
The Board’s website is linked to the Governor’s Office website. The website address is: [http://boardofvisitors.mt.gov](http://boardofvisitors.mt.gov)

Reviews and Outcomes

Reviews conducted
The Board has fulfilled its legislative responsibilities diligently throughout its existence. Since 1996, the Board has conducted 73 formal site reviews of mental health and developmental disabilities treatment facilities across Montana. Emphasizing a holistic, collaborative, collegial approach in its reviews, the Board believes strongly that the quality of its relationships with service providers over time is critical to the credibility of its recommendations and efforts to improve services.

Results of reviews
The Board makes a number of written recommendations in its reports on mental health and developmental disability facility reviews. From January 2006 through December 2007, the Board made a total of 168 recommendations to ten facilities. Recommendations addressed the following areas: consumer employment training and placement; individual living skills training; independent advocacy services; assessment, treatment plan formulation, and revision; sensitivity to and staff training for issues related to mental health care for American Indian people; medication administration; abuse and neglect policy; staff knowledge, competency, and training; consumer rights; interagency collaboration; program structure; and co-occurring disorders treatment.
Strategic Plan
The Board continues to update its ongoing, dynamic strategic plan. During its annual Board meeting in August 2007, the Board further expanded its strategic planning efforts by retaining the services of a planning facilitator. The current strategic plan can be found on the Board’s website at http://boardofvisitors.mt.gov/.

Future Directions
The Board and its staff will continue to improve the sophistication and effectiveness of its facility reviews, its assistance to individuals, and its legal and advocacy services. Priorities for the next two years are identified in the Board’s strategic plan.

- Propose more significant state mental health service involvement with Indian reservations / tribes.
- Develop satisfaction survey for people who request assistance from the Board.
- Increase participation in mental health Local Advisory Councils and Service Area Authorities.
- Maintain persistence in advocating for development of a coherent conceptual framework for mental health system planning with the New Freedom Commission goals as the foundation.

Dedication of Board Members and Staff
It continues to be the Executive Director’s privilege to work with the dedicated professionals on the Board and staff.

The Governor’s Office continues to identify and select individuals of high integrity, expertise, and community standing to serve as members of the Board.

The dedicated staff members of the Board of Visitors continue to perform in a way that serves the interests of the citizens of Montana at a very high level. Colleen Nichols recently logged her 25th year as Paralegal, Assistant to the Executive Director, and developmental disabilities specialist, and continues to function as a foundation of stability and excellence. Craig Fitch has developed into a statewide expert in mental health advocacy and legal representation as the Board attorney and manager of its legal services office at Montana State Hospital. His ongoing professionalism, insight, humility, and common sense are critically important to the depth and credibility of the Board’s decision-making. LuWaana Johnson joined the Board of Visitors team in October 2006 and has made a significant contribution to the professionalism and efficiency in the legal services office. Her ability to engage constructively with staff and empathize with patients has enhanced the Board’s “customer service” at Montana State Hospital.

Summary
The Mental Disabilities Board of Visitors has continued to perform its essential functions under Montana law. The Board has established a record of excellence, and has developed processes and a body of knowledge that contribute significantly to the efforts of consumers, family members, the State of Montana, and the many committed service providers to continually improve services for people with mental disabilities.
3. Purpose and Functions of the Board

The Mental Disabilities Board of Visitors was created in 1975 by the Montana Legislature to provide independent oversight of publicly-funded mental health services and developmental disabilities residential facilities. The Board is an independent board of inquiry and review that is responsible to ensure that the treatment of all persons either voluntarily or involuntarily admitted to a mental health facility in Montana or the Montana Developmental Center is humane, is consistent with established clinical and other professional standards, and meets the requirements set forth in state law.

The Mental Disabilities Board of Visitors is attached to the Governor for administrative purposes, and employs staff that carry out its duties. The Board consists of six persons appointed by the Governor for two-year terms.

Types of Review
The Board may conduct reviews at any time, but reviews are primarily:

(1) routine, scheduled reviews

(2) special reviews prompted by specific problems that come to the Board’s attention

Other Functions and Duties of the Board
(1) review and approve all plans for experimental research or hazardous treatment procedures involving people admitted to Montana Development Center or any mental health facility

(2) review, and if necessary, conduct investigations of allegations of abuse or neglect of people admitted to Montana Development Center or any mental health facility

(3) review and ensure the existence and appropriateness of treatment plans

(4) inquire concerning all use of restraints, isolation, or other behavioral controls

(5) assist persons admitted to Montana Development Center or any mental health facility to resolve grievances

(6) report to the director of the Department of Public Health and Human Services if the Montana Development Center or any mental health facility is failing to comply with the provisions of state law
4. Membership on the Board

Board members during the period covered by this report were:

- Joan-Nell Macfadden, Chair, Great Falls
- Suzanne Hopkins, Vice-Chair, Lewistown
- Teresa Lewis, LCSW, Harlem
- Sandy Mihelish, Helena
- Susan Duffy, Missoula
- Brodie Moll, Ronan

5. Administration of the Board

Mental Disabilities Board of Visitors staff:

- Colleen Nichols, Paralegal, Helena
- Craig Fitch, J.D., Attorney, Montana State Hospital
- LuWaana Johnson, Paralegal, Montana State Hospital
- Gene Haire, Executive Director, Helena
6. Recommendations for Transforming Mental Health Care in Montana

In making recommendations to the Governor’s office and the Department of Public Health and Human Services, the Mental Disabilities Board of Visitors draws on its experiences with and observations of every kind of mental health program in Montana over 32 years. The Board’s Standards are based on these experiences as well as extensive research into what high quality public mental health services look like.

The Board believes that the most compelling template for mental health system transformation is contained in the goals and recommendations in the final report of:

- the New Freedom Commission on Mental Health
  [http://www.mentalhealthcommission.gov/reports/reports.htm](http://www.mentalhealthcommission.gov/reports/reports.htm)

Other bodies of work that similarly define the characteristics of transformed mental health care for adults with serious mental illness and children with emotional disturbance are:

- NAMI’s Grading the States 2006: A Report on America’s Health Care System for Serious Mental Illness
  [http://www.nami.org/gtstemplate.cfm?section=grading_the_states&lstid=681](http://www.nami.org/gtstemplate.cfm?section=grading_the_states&lstid=681)

- The Campaign for Mental Health Reform
a collaboration of 17 national health organizations, representing millions of Americans, dedicated to making mental health a national priority and early access, recovery and quality in mental health services the hallmarks of our nation’s mental health system

- policy recommendations of the Mental Health Liaison Group
52 national organizations representing consumer, family members, advocates, professionals and providers

The final report of the New Freedom Commission on Mental Health is called Achieving the Promise: Transforming Mental Health Care in America.

The Mental Disabilities Board of Visitors’ four overarching recommendations for transforming mental health care in Montana continue to be:

I. Adopt the framework and strategic objectives of the New Freedom Commission on Mental Health as a model for programming and system development in Montana.

II. Proactively partner with the Substance Abuse and Mental Health Services Administration (SAMHSA) to aggressively implement Evidence-Based Practices.²

III. Review and replicate what other states have been doing to use the New Freedom Commission Report Goals and Recommendations in mental health system transformation.³

IV. Envision what a functional, fully-developed, state-of-the-art mental health system should look like in Montana, then work with the Legislature over time to fund that system.

Specific recommendations for system transformation are contained in the Board’s Report to the Governor for July 1, 2004 through December 31, 2005.
The following recommendations reflect common themes that have emerged as general needs throughout Montana’s public mental health system based on the Board’s site reviews.4

All organizations providing mental health services should:

1) develop dynamic strategic plans

2) develop a service evaluation strategy that promotes participation by staff, consumers, family members, other service providers, and other community stakeholders

3) routinely measure health and functional outcomes for individual consumers; publish aggregate outcome data

4) provide comprehensive, professionally-prepared information to consumers and family members about mental illnesses, evidence-based services, medications, and community resources

5) proactively identify and (with permission) include family members in consumers’ treatment

6) take responsibility for ensuring consumer access to primary health and dental care

7) develop cultural competence among staff, and strong collaborative working relationships with experts in culturally competent mental health services

8) develop minimum staff competency standards and provide comprehensive training to ensure staff competence

9) focus primarily on provision of established evidence-based practices and emerging best practice models

10) develop appropriate employment support for consumers

11) move assertively toward full implementation of integrated services for persons with co-occurring psychiatric and substance use disorders

12) ensure easy-to-access, fast-response crisis response and intervention services

13) proactively take responsibility for quality consumer transitions into and out of services, especially to and from higher levels of service
7. **Recommendations for the Montana Developmental Center**

In making recommendations to the Governor’s office and the Department of Public Health and Human Services, the Mental Disabilities Board of Visitors draws on its experiences with and observations of its developmental disabilities specialist, Colleen Nichols, on a weekly basis at Montana Developmental Center over 24 years.

**BOV Recommendations:**

1) Develop and provide community-based living options for people when they have achieved maximum treatment benefit at the Montana Developmental Center.

2) Reconfigure the current living/treatment environments at the Montana Developmental Center so that consumers have the opportunity to receive treatment in an atmosphere that is conducive to treatment (i.e., fewer residents in each unit and individual bedrooms).

3) Implement a viable sex offender treatment program for adults with developmental disabilities in a community-based setting as an extension to the Therapeutic Milieu and Level System Program for Sexual Offending Behaviors program at the Montana Developmental Center.

4) Develop long-range strategic and funding planning that evolves the Montana Developmental Center from a long-term residential treatment facility into a specialized, short to medium-term treatment and training facility.

**Endnotes:**

1 Includes requests for assistance, requests for information, referrals, and direct assistance.

3 Other states’ New Freedom Commission-based SAMHSA Transformation grant projects to focus on are in Connecticut, Ohio, and Washington.

4 Mental health organizations do a good job in certain of these areas as reflected in individual site review reports, however these areas are generally in need of improvement throughout the system.
