

New Day, Inc.

Responses to BOV Recommendations

1. BOV recommends Indigenous tribal flags be on display in both the administrative building, and more importantly at the ranch for the clients to see daily to strengthen connection to culture and identity.
 - **Indigenous tribal flags are an excellent way to strengthen connection to culture and identity. New Day, Inc. has begun researching the purchasing of posters. A meeting was held to discuss this, and the Dining Area was identified as the place to display them. Below is the site being reviewed for the purchase:**

https://www.tribalnationsmaps.com/store/p3328/Tribal_flags_of_Montana_%28Bundle_-_All_8_flags%29.html#:~:text=8%20flags%20included%20are%20of%20the%20following%20Tribal

2. BOV recommends New Day, Inc. explore partnerships with community churches and places of worship to ensure that clients have opportunities to practice their religious beliefs.
 - **New Day, Inc. has an Outreach Coordinator assigned to increase community partnerships, including places of worship to help ensure clients have opportunities to practice their religious beliefs. Potential partnerships include, but are not limited to, Faith Chapel and Harvest Church. New Day, Inc. also promoted an employee to a position that allows for an additional driver to accommodate the transportation to and from community partnerships.**
3. BOV recommends New Day, Inc. review the language used in treatment plans and ensure it is easily understood by all clients.
 - **The New Day, Inc. Clinical Director is working with clinicians to enhance their individualized treatment plans with measurable, trauma-informed care goals. This occurs individually and during supervision meetings, and will include a focus on the language used to ensure it is easily understood by all clients and their families.**
4. BOV recommends New Day, Inc. look to utilize an electronic healthcare record system within the organization.
 - **An electronic healthcare record system has been on New Day, Inc's wish-list for quite some time. Currently researching and applying grants to help achieve this goal. A bid has been received for the electronic healthcare record system called myEvolv (see attached).**
5. BOV recommends New Day, Inc. explore opportunities to provide staff with in-service training focused on person-centered relationships and professional care giving.
 - **New Day, Inc. recently revised the orientation of new employees with a longer and more detailed training. It continues to be reviewed for improvement areas, in addition to the implementation of quarterly topics designed to enhance person-centered relationships and professional care giving. Also looking into online resources.**
6. BOV recommends New Day, Inc. explore opportunities and programs to allow clients more exposure to real-life skills to better prepare clients for their discharge.
 - **New Day, Inc. is reviewing potential curriculums for independent living skills that could be utilized in the academic portion of our mental health center and at the therapeutic group homes. Also continuing to enforce the positive peer culture with such discussions among the Youth Advisory Council.**
7. BOV recommends New Day, Inc. explore options for the construction of an outdoor area or gazebo that may help improve the outdoor usability of the space.
 - **New Day, Inc. is reviewing the budget for ways in which we can enhance our outdoor space to provide a comfortable shady area.**
8. BOV recommends New Day, Inc. explore opportunities to develop and offer more services for the young adult population 18-21-year-olds.
 - **New Day, Inc. is reviewing potential curriculums for independent living skills that could be utilized in the academic portion of our mental health center and at the therapeutic group homes. Exploring resources at the Lincoln Center, HRDC, & Chafee.**

Direct secure messaging

Telehealth

Key features

- On-demand and scheduled virtual visits
- Receive alerts when individual enters waiting room/session
- Expand access to provider shortage areas removing geographic barriers to care
- Improved outcomes with timely access to high-demand specialties, such as addiction treatment, psychiatry and after-hour access to physicians
- Access and launch a HIPAA-compliant telehealth session from an EHR

Eliminate the walls of treatment, expand coverage area

Improve provider capacity management

Provide a virtual presence in emergency departments to triage individuals that present with behavioral health and substance use conditions

Enhances client satisfaction and convenience by expanding options for receiving care and providing a frictionless consumer experience
